TITLE: Deep-sea mining of seafloor massive sulfides

AUTHOR: ['Porter Hoagland', 'Stace E. Beaulieu', 'Maurice A. Tivey', 'Roderick G. Eggert', 'Christopher R. German', 'Lyle Glowka', 'Jian Lin']

ABSTRACT:

The potential emergence of an ocean mining industry to exploit seafloor massive sulfides could present opportunities for oceanographic science to facilitate seafloor mineral development in ways that lessen environmental harms.
